REVISED COURSES FOR ANIMAL GENETICS AND BREEDING

A "polygene" or "multiple gene inheritance" is a member of a group of non-epistatic genes that interact additively to influence a phenotypic trait. The term "monozygous" is usually used to refer to a hypothetical gene as it is often difficult to characterise the effect of an individual gene from the effects of other genes and the environment on a particular phenotype.

Canalisation is a measure of the ability of a population to produce the same phenotype regardless of variability of its environment or genotype. It is a form of evolutionary robustness. The term was coined in 1942 by C. H. Waddington to capture the fact that "developmental reactions, as they occur in organisms submitted to natural selection...are adjusted so as to bring about one definite end ...

As the highest-ranked open access journal in its field, Genome Biology publishes outstanding research that advances the fields of biology and biomedicine from a genomic and post-genomic perspective. Our responsive international editors provide excellent service and communication to authors throughout the entire publishing experience.

Bilateral hippocampal sclerosis occurs in approximately 10 to 20% of cases and can be difficult to identify using MRI. In these cases, quantitative methods and the identification of the complete loss of digitations in the hippocampal head are useful for diagnosis (). The so-called "dual pathology" occurs when mesial temporal sclerosis is associated with another epileptogenic abnormality ...

Sugarcane (*Saccharum* sp.) is one of the most important crops in Brazil, and is the source of a large number of products, including sugar and ethanol. In addition, the bagasse residue from the industry has also gained importance in the co-generation of electricity. The high demand for these products ...

Charles Hendry, former energy secretary, published his long awaited report on the Swansea Bay tidal lagoon power station last week coming down in favour of the project. Hendry's report is comprehensive but has one key omission. It does not ask if tidal lagoons can provide renewable base-load power in the UK as is often claimed.
