### The Market

Make sure that the shoe bends easily under the ball of your foot. Make sure there is no tightness or rubbing, and that the shoe's arch support matches up with your foot's arch. 9. After lacing, make sure that the lace holes on either side of the shoe are at least one inch apart.

### A Guide to Properly Fitting Athletic Shoes

ground. But because there is friction between your shoe and the ground, there is a frictional force tending to oppose that motion of your shoe backward and therefore the ground pushes forward on your shoe, which allows you to walk forward, as shown in figure 6.3.

### Chapter 6 Newton's Laws with Friction, and Circular Motion

The meaning of the regression coefficients changes apace, with the regression of left shoes on price and right shoes, and the regression of wages on education with industry controls as classic cautionary tales. (See ps at the end if these aren't obvious.) There is a similar tension between robustness and efficiency.

the indifference curves for the goods are shaped as right angles Example: If you have 1 left shoe and 1 right shoe, you are indifferent between having more left shoes only Must have one right for one left. That's why we always get a pair of shoes, not one by one. Find your own examples.

### Indifference Curves: (pp. 65 - 79) An Example

Pattern can be used to make women's shoe sizes 5 and up. To make a size 5 or 6 shoe, you'll need to decide if you'd like to repeat the toe pattern as pictured (with three rows of windows on the toe) or to eliminate one section of windows so that the shoe hits your foot in a similar place to the sample.
